Report

Creating a DataBase called 'rental_shop'.

Creating a table in the mentioned DataBase called 'rentals'.

The table mentioned has the attributes as follow :-

- rental_id - primary key - automatically incremented.
- customer - a name of maximum 50 character - can't be empty .
- costume - a name of maximum 50 character - can't be empty.
- rent_date - the date of renting - stored the date automatically when adding a new customer - and can't be in the future.
- return_date - the date of returning the cosplay - empty until the customer return the cosplay.
- daily_rate - the rate of the cosplay - a value between 0 and 30.
- insertion_date - for administrator - stores the date of adding a new customer.
- update_date - for administrator - stores the date of updating on a customer.
